ELSEVIER

Volume 198, Numbers 1–2, October 1996

WEAR

Contents

Prediction of the stability of air thrust bearings by numerical, analytical and experimental methods 1
M. Fourka, Y. Tian, M. Bonis (Compiègne, France)

Analysis of the friction and wear mechanism of structural ceramic coatings
Part 2: The effect of operating conditions and substrate material 7
J.F. Lin, M.H. Liu (Tainan, Taiwan), J.D. Wu (Kaohsiung, Taiwan)

An analysis of fracture and delamination in thin coatings subjected to contact loading 15
S.A.G. Oliveira, A.F. Bower (Providence, RI, USA)

The model for tool wear in rock cutting 33
O.G. Checkina, I.G. Goryacheva (Moscow, Russia), V.G. Krasnik (Kiev, Ukraine)

Condition monitoring of the grinding process using light scattering 39
B.J. Griffiths, R.H. Middleton, B.A. Wilkie (Uxbridge, UK)

Diagnosis of failure of rolling-element bearings of alternators—a study 46
H. Prashad (Hyderabad, India)

Effect of dissolved oxygen on the formation of iron fluoride, friction and wear in an iron/iron frictional system under perfluoropolyether fluid lubrication 52
K. Nakayama (Ibaraki, Japan), T. Kobayashi (Kanagawa, Japan)

The tribological performance of 6061 aluminum alloy/graphite composite materials in oil lubrications with EP additives 58
J.F. Lin, M.G. Shih, Y.W. Chen (Tainan, Taiwan)

Triboemission characteristics of electrons during wear of amorphous carbon and hydrogenated amorphous carbon films in a dry air atmosphere 71
K. Nakayama, H. Ikeda (Ibaraki, Japan)

Indentation energy and abrasive wear of metals 77
P. Kallas (Tallinn, Estonia)

Formation and separation of the fragmented surface structure of low-carbon steel and copper under friction 86
I.I. Garbar (Beer-Sheva, Israel)

Mechanics of fretting fatigue crack formation 93
M.P. Szolwinski, T.N. Farris (West Lafayette, IN, USA)

Dry sliding friction and wear behaviour of short fibre reinforced zinc-based alloy composites 108
S. Yu, Z. He, K. Chen (Changchun, People's Republic of China)

Analysis of an arbitrary shaped guide bearing subject to normal oscillation and translation of a plate 115
Y.K. Wang, C.D. Mote, . Jr (Berkeley, CA, USA)

Effect of fiber orientation on a graphite fiber composite in single pendulum scratching 122
Y.N. Liang, S.Z. Li, R.H. Zhang, S. Li (Shenyang, China)

Effects of Mn content on the tribological behaviors of Zn–27% Al–2% Cu alloy 129
Y. Li, T.L. Ngai, W. Xia, W. Zhang (Guangzhou, China)

Tool wear monitoring in face milling using force signals 136
S.C. Lin (Hsin-Chu, Taiwan), R.J. Lin (Tai-Chung, Taiwan)

The tribological properties of TZP–graphite self-lubricating ceramics 143
H. Liu, Q. Xue (Lanzhou, China)

Progress of erosive wear in spheroidal graphite cast iron 150
K. Shimizu (Oita, Japan), T. Noguchi, T. Kamada, H. Takasaki (Sapporo, Japan)

Elsevier Science S.A.

Hydrodynamic lubrication of long, flexible, porous journal bearings using the Brinkman model 156
J.-R. Lin, C.-C. Hwang, R.-F. Yang (Chung-Li, Taiwan)

High friction coefficient of fullerene C_{70} film 165
W. Zhao, J. Tang (New Orleans, LA, USA), Y. Li, L. Chen (Beijing, People's Republic of China)

Effect of humidity on friction and wear of Al–Si eutectic alloy and Al–Si alloy–graphite composites 169
B.K. Yen, T. Ishihara (Yokohama, Japan)

Changes in surface texture of zinc-coated steel sheets under plastic deformation 176
T. Mizuno, H. Mulki (Nagoya, Japan)

Wear maps of TZP/steel reciprocating sliding couple under dry sliding 185
H. Liu, Q. Xue, L. Lin (Lanzhou, China)

On the formation mechanism of adherent layers on a cutting tool 192
H.S. Qi, B. Mills (Liverpool, UK)

Damage processes in Si_3N_4 bearing material under contact loading 197
Z. Chen, J.C. Cuneo, J.J. Mecholsky, Jr (Gainesville, FL, USA), S. Hu (WPAFB, OH, USA)

Lubrication of stellite at ambient and elevated temperatures by transfer films from a graphite slider 208
A.W. Batchelor, L.N. Lam, M. Chandrasekaran (Singapore, Singapore)

The effect of particle size of nanometer ZrO_2 on the tribological behaviour of PEEK 216
Q. Wang, Q. Xue, H. Liu, W. Shen, J. Xu (Lanzhou, People's Republic of China)

Prediction of tool life in oblique machining with nose radius tools 220
J.A. Arsecularatne, R.F. Fowle, P. Mathew, P.L.B. Oxley (Sydney, Australia)

Characterization and application of the sliding wear of hardened die steel against SiC whisker–plastic composite 229
I. Horaguchi (Aichi-ken, Japan), J.E.D. Afaghani, K. Yamaguchi, T. Nakamoto (Nagoya, Japan)

Wear behavior of a TiNi alloy 236
Y.N. Liang, S.Z. Li, Y.B. Jin, W. Jin, S. Li (Shenyang, People's Republic of China)

An approach towards fatigue wear modelling 242
S. Karmakar (Pilani, India), U.R.K. Rao, A. Sethuramiah (New Delhi, India)

Sliding wear behavior of thermally sprayed 75/25 Cr_3C_2/NiCr wear resistant coatings 251
M. Mohanty, R.W. Smith (Philadelphia, PA, USA), M. De Bonte, J.P. Celis (Heverlee, Belgium), E. Lugscheider (Aachen, Germany)

The effect of oxygen partial pressure on the stability of Magneli phases in high temperature corrosive wear 267
M. Serratos, A. Bronson (El Paso, TX, USA)

Wear of cylinder bore microtopography 271
B.-G. Rosén, R. Ohlsson (Göteborg, Sweden), T.R. Thomas (Coulby Newham, UK)

Characteristic features of wear in tools made of high-speed steels with surface engineered coatings
II: Study of surface engineered high-speed steel cutting tools by AES, SIMS and EELFAS methods 280
G.S. Fox-Rabinovich, A.I. Kovalev, S.N. Afanasyev (Moscow, Russia)

A study on the behavior of adiabatic shear bands in impact wear 287
B. Zhang, Y. Liu, W. Shen, Y. Wang, X. Tang, X. Wang (Beijing, China)

The effect of palm oil diesel fuel contaminated lubricant on sliding wear of cast irons against mild steel 293
H.H. Masjuki, M.A. Maleque (Kuala Lumpur, Malaysia)

Influence of surface melting on dry rolling–sliding wear of aluminium bronze against steel 300
Z. Shi, A. Bloyce, Y. Sun, T. Bell (Birmingham, UK)

Viscoelastic effects in lubricated contacts 307
I. Goryacheva (Moscow, Russia), F. Sadeghi, G. Xu (West Lafayette, IN, USA)
